LONGFELLOW'S POETICAL APHO-

THE BEST MEDICINES, Joy and temperance and repose Slam the door on the doctor's nose. Man-like is it to fall into sin, Flend-like is it to dwell therein, Carist-like is it for all to grieve, God-like is it all sin to leave.

Though the mills of clod grind slowly,
Yet they grind exceeding small;
Though with patience lie stands waiting,
With exactness grinds He all.

A blind man is a poor man, and blind a poor man is, For the former seeth no man, and the latter no man

LAW OF LIFE.
Live I, so live 1,
To my Lord hearti'y,
To my Prizee faithfully,
To my neighbor honestly,
Die 1, so die I.

Extant are; but still the doubt is, where Christianity may be.

A milistone and the human heart are driven ever round;
If they have nothing else to grind, they must themselvos be ground Whilem Love was like a fire, and Warmith and comfort it bespoke; But, a asl it now is quenched, and Only bites us, like the smoke.

ART AND TACT. Intelligence and courtesy not always are combined, Often in a wooden house a golden room we find.

When by night the frogs are craking, Kindle but a torch's fre; Ha! how soon they all are silent! Thus truth silences the liar.

THE END OF A STAGE COACH TRAGEDY.

I was traveling agent for a large firm, and in the course of business visited the flourishing little town of Bellair, where onr people had many customers. It was about the middle of August, and on the very night of my arrival that usually The

The timekeeper was in a state of great agitation, walking to and fro, and wondering what had become of the coach. It was at last supposed that some accident must have befallen the coach, and assistance was being prepared in the already told.

The most These were nearly ready, but when just upon the point of starting the loud blast of the coachman's horn was heard, was exchanged for wonder as to the cause of its delay. A few moments later it drove up in due form before the office, and a little erowd gathered to investigate the origin of such an unusual cir-

The coachman, upon being questioned, gave a very clear and simple explan-ation of the affair. A passenger, he said, had suddenly insisted on alighting, and had banged the door so violently that one of the horses had taken fright. This had started the other horse, and the two had at once galloped madly away, nearly olishing the coach, and were not brought to nutil one of them fortunately stumbled and hurt his fore leg severely, causing considerable delay. The appearance of the horse witnessed to the truth of this statement. Every one was for the moment satisfied with this account of the delay, but only for a moment, for the uext instant a much more exciting and horrible discovery than the delay of

One of the porters lounging about very naturally opened the coach door and prepared to assist the passengers to alight. But no one stirred within. It was too dark to see, but the porter, putting his hand in, felt the person of a human being, as he thought, very wet, and who must, from his meensibility, wither he sleaving or the meets and the seed of the seed either be sleeping, or else was perhaps stunned by the accident on the road.

"Hallo, John," cried he, "who the deuce have you got here? The old en's either deadly asleep or else ne's fainted when the horses ran off l' The coachman, whose name, it may here be stated, was John Rush, replied very calmly:
"Oh, he's all right, Bill. Him and

his pal had a tiff, but I fancy they'd been drinkin', and now he's got asleep." Saying so, he brought forward a lantern, the light of which Bill afterward thought made him deadly pale. They, however, cast the light into the coach npon the sleeping gentleman, but the noxt second they drew back with a shout of horror. Bill saw by the light that it was not the rain which had damped his hands; the stain npon them could not be mistaken. "It's blood! It's blood!" oried, shaking the thick crimson drops from his fingers.

As for poor Rush, the coachman, he ooked on in blank amazement, like man stricken dumb. The noise which Bill made attracted the attention of all around, who were now only just begining to guess at the cause of the delay. A scene of terrible excitement followed. The whole street was in coufusion. It was discovered that the coach contained only one passenger, or rather his corpse, for he lay in a pool of blood quite dead, and it was evident that he had been most foully mnrdered. Examination showed that he was a man in the prime of life, well dressed and of gentlemanly appearance, but without purso, pocketbook, papers, or any other article by which he could be identified, excepting a small envelope with two cards in t-supposed to be his own—and bear-ing the name of Samuel Robinson. It as evident that he had been stabbed addenly in the neck, and death must

bave been almost instantaneous. great. The proper officials were sent for and an investigation made. Every one was questioned as to who the mur-derer could be and what steps could be taken to effect his capture. As might had to doing business with lawyers, of the coach—wounding the horse himber expected, all eyes were turned to But time and love would allow of no selt, so as to bear out his tale. be expected, all eyes were turned to Rush, the coachinan who were noticed. dush, the coachinan, who was naturally apposed to be likely to know something bout the matter. In fact, some people wen suggested that he might possibly now more than he cared to tell; but his was only scandal. He was very alm and collected, and, stating to the clice anthorities that he thought he could give valuable information, he accompanied them to the station.

a violent dispute going on inside the coach. He stopped the horses and went to the door. Only two passengers were Jane's lover, Fred, had to go early, but then inside-one a young man with dark | Uncte Tom stayed to supper. Jane and eyes and chestnut hair, and the other he her mother went with him to the gate, could swear was the murdered man, and there bade him good-night. They seemed to be in high dispute; but when they saw him, and knew that their | to his ledgings, and after arranging with altercation had stopped the eoach, the his landlady to rouse him early the folmurdered man-he was certain he could his head out of the window, and said :

"What do you want? My friend and I had a few harsh words, and what is that to you?"

When he heard this he remounted the box. About five minutes later continues to be much agitated, which he supposed to be on account of the dispute. He did not notice at the time which gentleman left, but could certainly swear that it was the murdered man who had spoken to mm from the window, and who appeared to be the principal in the dispute. A few minutes after tho unknown gentleman left the murdered man the accident occurred which prevented the coachman from any very close remembrance of particular incidents.

Bush, the stage coachman, appeared whose is that the vas going to that town for a day or two, he left. He booked from Outbourne by the 6 o'clock stage and arrived early in Woodley. The next day his sister received a letter from that town, stating that after seeing his lawyer he found it necessary to go on to Bellair, but would return the next day. The next day and the next day eame, but Thomas Ellwood never came back again. In his letter he stated that the business in question might have been done by an agent, but that Mrs. Conway's impatience and angry words had so agitated him that he had resolved to go on at once and do everything himself. He finished his letter with an expression of love, but Mrs. Conway never

Rush, the stage coachman, appeared to be much troubled during his examination by the police, which was very natural, as he had good reason to know that he would be greatly blamed, and would probably in the angle he distributed in sletter with an expression of love, but Mrs. Conway never forget or forgave her own hasty words to which he alluded.

As day after day passed, Mrs. Conway never forget or forgave her own hasty words to which he alluded.

Way, finding her brother still mysteria. Deronda. would probably in the end be dismissed ously absent from home, and that, as far for carelessness. It is no pleasant thing as she could learn, he had not only been to drive a coach, and to have people away for a much longer time than busi-murdered in it. He was, however, much ness could require, but had never been relioved when he found that his conduct, seen since, began to be much agitated, on account of the excitement occasioned especially as every one was talking of a by the accident, was not considered to horrible murder in the Bellair coach. be very enlpable, and that he was only bound ever to attend and give evidence she learned how the victim had said this

quiet and sober place was thrown into a state of consternation by the occurrence of a very unusual circumstance. The stage coach was accustomed to arrive about 8 colors by the constraint of the constraint of the constraint of the constant about 8 o'clock, but ou the day in question that hour passed and the stage did

The next was the coachman, John

All this evidence he gave in a clear, straight-forward manner, such as, it was he met in the street, and, as there was no thought, proved him beyond a doubt evidence to refute this statement, he was to have no complicity in the foul deed. at once discnarged. Rush now saw that these were one or two others who were present at the time, including the medical man who examined the corpse.

The Coroner summed up with great ability, and the jury, without a moment's consideration, returned a verdict of willful murder against some person or per-

The next day the body of the murdered man was buried and the police renewed their search, but everybody saw that, after a little popular indignation, and a little fuss on the part of the newspapers, the tragedy of the Bellair stago would probably become one of those mysteries which wait for elucidation and punishment until the day of doom. Strange to say, however, the perpetrator of the crime was discovered, and convicted on his own evidence, and the very means which ho adopted to hide the dreadful deed were the occasion of it being brought to light, as I shall now

briefly explain. Tho town of Bellair was about forty or fifty miles from Woodley, and the stage ran between the two places. A few miles from Woodiey was another small town called Oakbourne, and in Oakbourne lived a widow lady, named Conway, and her daughter.

Mrs. Conway had a brother who was deaf and dumb. His name was Thomas Ellwood. His allliction, as might be supposed, was a source of great trial to his family, and had his parents been for trial. his father, old Mr. Ellwood, had but two Mr. Ellwood and said nothing about it such a metamorphosy?" How? How children, the eldest a girl-who married | he might possibly have escaped. But he does the winning horse lap and pass while young a certain Mr. Conway-and Thomas, of whom I am about to speak.

After Jane Ellwood became Mrs. Conway she saw very little of her own family, for her mother was already dead, and in less than a year after her wedding day she lost her father, and now her only surviving relative was her brother

To Thomas Ellwood his father left almost all that he possessed, saving that his daughter, being married, wanted lit- fortunate man never could speak; theu, tle, and that poor Tom could do nothing for himself. "Poor Tom," however, at "The game is played out," and fainted. boy, for he had nearly reached his 40th ful murder against John Rush. year, but he had never married. His sister, Mrs. Conway, was older than himself, and had an only child, a daughter, now about 17 years of age, called, Mr. Ellwood did really leave his hotel sity to be beautiful puts incipient wringer.

after her mother, Jane. Ellwood, had declared that as he was, on account of his infirmity, likely to spend hisdays in bachelorhood, he would and he was left alone. Rush had some ointment-lined gloves, and put the brakes on a too expansive waist. Men pursue ambition, wealth, and that bubmoreover, a lover, a right good young him to carry a large sum had, when he cannon's mouth of physical tor man, to whom her mother had promised that she should in due time be stopped the coach, and in an unguarded stopped the coach, and in a unguarded stopped the coach, and in an unguarded stopped the coach, and in a unguarded stopped the coach The excitement at Bellair was very reat. The proper officials were sent promised, to settle a certain large sum man was to bury him on the spot; but, par and an investigation made. Every hitherto neglected doing so, chiefly on account of an innate dislike which he coeted a story to account for the delay longer delay. Uncle Tom had promised his sister and niece that he would arrange

abont the property early in the month of Angust, which had already begun; but when, two days after, he called at Mrs. Conway's house, he allowed that he had totally forgotten all about it. This confession was, of course, all made

There he made the following imporant statement: He had started, he said,

The Wall of the Poor.

And why do they wail? Because POETRY comes nearer the vital truth three-fourths of their hard earnings are filehed from them by monopolies. First, the landlord must have his slice. Then the railroad companies have theirs. Then the speculator has his. Then the banks, drawing interest on bonds-for nine-tenihs of which they have paid use the money they receive for the bonds to fleece merchants and manufacturers by shaving their notes. But who are the victims? Are they simply the hard-working mechanic and farmer, and laborer and clark, or the poor man and woman without work, or the widow and her fatherless cildren? By no means. Though, if the were all, the calamity would be sufficiently appalling. Every merchant, ever manufacturer, every lawyer and philicing—in short, every lawyer and phyticing—in short, every one who work—is living and is not a landlord, raile—hagnate or a speculator, a bank or a downer, suffers. A large proportion the earnings of the capital and labor of the merchant or manufacturer is absorbed by the land-

lord, the railroad companies and the banks; and in uine cases out of ten, he is forced, at some time during his experience as a business man into hankruptcy, while the land owner and others who toil not reap the beneit of his labor and capital. Some one asks, What is a civilization which produces such wesults worth? Evidently nothing. Under it one in ten thousand accumulates vasts sums by the labor of the other nine thousand uine hundred and ninety-nine, and these are

reduced to a condition of semi-slavery. Says another. Where is the remedy? It is in the hands of the people, the very ones who are being robbed of their earnings. Let them stop voting for so-called "Republicans" and so-called "Democrats," whose only principles are the spoils and nothing but the speils, and who are bought up and used by the very monopolies which rob the people. Let us have men in Congress and in our State Legislatures who are in sympathy

with the people, and not with the railroad companies, land grabbers and bank leeches, and the evil will gradually be abated and finally annihilated.

Then why should the people not have the benefit of the value? A hundred years ago a lot on Broadway could have been bought for a few hundred dollars. The same lot to-day will bring a hundred thousand dollars. Self-district is the cause of most of Who enhanced its value? The people. strength there is strength, and they are creased value? egitation, walking to and fro, and won-dering what had become of the coach. assistance was being prepared in the shape of horsemen to search the road. These were nearly ready, but when just upon the point of starting the loud blast of the coachman's horn was heard, and anxiety as to the safety of the stage his word the fight cause of its delay. A few moments later it drove up in due form before the office,

and a little crowd gathered to investi-gate the origin of such an unusual cir-cumstance. The coachman, npon being questioned, gave a very clear and simple explanation of the affair. A passenger, he said, had suddenly insisted on alighting, and had banged the door so violently that one of the horses had taken fright. This had started the other horse, and the two had at ouce galloped madly away, nearly demolishing the coach, and were not brought to until one of them fortunately

The Coroner summed up with great ability, and the jury, without a moment's consideration, returned a verdict of will-ful murder against some person or persons unknown.

One of the porters lounging about very naturally opened the coach door and prepared to assist the passengers to alight. But no one stirred within. It was too dark to see, but the porter, putting his hand in, felt the person of a human being, as he thought, very wet, and who must, from his insensibility, either be sleeping, or else was perhaps

Saying so, he brought forward a lan-tern, the light of which Bill afterward thought made him deadly pale. Thoy, however, cast the light into the coach upon the sleeping gentleman, but the next second they drew back with a shout of horror. Bill saw by the light that it was not the rain which had damped his hands; the stain npon them could not nds; the stain npon them could not mistaken. "It's blood | It's blood |" oried, shaking the thick crimson ps from his fingers,

nd, who were now only just beginng to guess at the cause of the delay.

vas discovered that the coach con-ained only one passenger, or rather his corpse, for he lay in a pool of blood quite dead, and it was evident that he had been most foully murdered. Ex-mination showed that he was a man in the prime of life, well dressed and of gen-demanly appearance, but without purse, booketbook, papers, or any other article by which he could be identified, except-ing a small envelope with two cards in the name of Samuel Robinson. It was evident that he had been stabbed addenly in the neck, and death must have been almost instantaneous.

There he made the following imporant statement: He had started, he said,
he woodley in the morning, with five

A single wan holds thousands of lots, all of which are made valuable solely by the people, and the many cases far The first principle of beauty, as praciced in this progressive town, is, "How The wife of an army officer accompanied her husband many years ago to his post in a distant frontier town. Among he acquaintances she formed there was a lady who, if remarkable at all, was noted for being exceedingly homely, awkward, and commonplace. She had a waist like a barrel, shoulders pitched forward, a rough, thick skin, coarso black hair, large, bold eyes, great feet; and besides all these physical defects she was dreadfully demonstrative in manner. She was the senior by savgard declared groundless, as her brother, be- manner. She was the senior by several years of the officer's wife. After a time spoken as the coaclimon asserted. A warrant, however, was obtained for exhuming the body of the murdered man. Spoken as the coaclimon asserted. A warrant, however, was obtained for exhuming the body of the murdered man. politics had lifted the husband of the homely lady into Congress, and the two friends met in society last winter. Mrs. Rush was now again arrested, although the magistrate was greatly opposed to the proceeding, as he justly was the transformation in the appearance of her old acquaintance. Mrs.

or fifty miles from Woodley, and the stunned by the accident on the road.

"Hallo, John," cried he, "who the deuce have you got here? The old gammen's either deadly asleep or else he's fainted when the horses ran off."

The coachman, whose name, it may here be stated, was John Rush, replied very calmly:

"Oh, he's all right, Bill. Him and his pal had a tiff, but I fancy they'd been drinkin', and now he's got asleep."

Saying so, he brought forward a lantern, the light of which Bill afterward thought made him deadly pale. Thoy, however cost the light into the coach and had his parents because the light into the coach and had his parents because the light into the coach and had his parents because the light into the coach and wondered, pondering the much harder than it really was; but his father, old Mr. Ellwood, had but two children, the eldest a girl—who married the might possibly have escaped. But he

The Wall of the Poor.

And why do they wail? Because three-fourths of their hard earnings are filched from them by monopolies. First, the landlord must have his slice. Then the railroad companies have theirs. the railroad companies have theirs.
Then the speculator has his. Then the pure gastric juice. The sturgeon is toothless and draws

Then the speculator has his. Then the banks, drawing interest on bonds—for nine-tends of which they have paid—uso the money they receive for the bonds to fleece merchants and manufacturers by shaving their notes. But who are the victims? Are they simply the hardworking mechanic and farmer, and laborer and cark, or the poor man and woman without work, or the widew and her fatherless cildren? By no means. Though, if they were all, the calamity would be sufficiently appalling. Every merchant, every manufacturer, every lawyer and phile in short, every one who were the salving and is not a landlord, rather magnate or a speculator, a bank or band owner, suffers. A large preportion of the earnings of the capital and labor of the merchant or manufacturer is absorbed by the landlord, the railroad companies and the landlord, and in nine traces out of ten he

Siberia Overrun With Mice. After all, the Czar is not to have it all his own way in Asia. While a dull world has been imagining that the English Government was taking no steps to prevent that consummation, the whole edifice of the Russian edifice is, it appears, on the point of collapse. With an amount of astuteness that does him every credit, Lord Ripon has kept silent on the matter, but the Calcutta Englishman at last lets the cat-or rather the miceout of the bag. These are Eugland's sllies in the grand work of staying the course of Russian aggression. Afghan course of Russian aggression. Alghan help might be treacherous, not to meution its costliness; Persian aid does not count for much; the Chinese would probably not appear in the field nutil a few years after the struggle had terminated. As for the Turcomans, what bribe have we to offer those predacious people compared to that blissful looting of Ludia which Russia could dangle boof India which Russia could danglo bofore their eyes? An ally had plainly to be looked for in some new quarter, and, Dress them in style that they will be afraid to play for fear of spoiling their clothes.

Make religion such a long-faced pokey of Indian mice have made their way to Southeastern Siberia, plundering gransoutheastern Siberia, plundering gran-srics, and destroying crops wherever they go. On they march—relentless, remorseless—through Fergana, through Semiretchausk, and right up to the shores of Lake Balkaseh. The affrighted people know not what to do to stem the devastating delnge, and even the danntless Russian warriors turu pale when the cry goes forth, "The mice are coming!" Rome was saved by geese; perhaps history will hereafter relate how the Eng-

Indla Proofs.

There are various ways in which deceptions are practised. For instance, "nnlottered India proof," as it is technically called, is, from being taken off the engraving at an earlier stage, very much superior to what is called a "lettered India print," which is obtained after many impressions have been taken off the engraving, and when the plate has, consequently, become worn, and the pieture lost its elearness and sharpness of line. To turn an "India print," therefore, into an "India proof," the India print is cut down all round closo

so little it weakens it, and if a joint is near the latter is sure to open. A black-smith that cannot fit an iron without smith that cannot fit an iron without depending upon its burning its way lown should never be allowed to work mouth with a napkin and then calmly st the forge.

GOSSIP FOR THE LADIES. All About Ethel.

This dear little Ethel, a dreamer is she,
And sweet are her fancies as zephyrs of morn
That ripple in summer time over the sea,
Or tangle themselves in the tassels of corn. She knows what the fairies are talking about When tiptoe they poles on the rim of a flower; The anow-birds before her trip fearlessly out, And gessip away in the cold by the hour.

No poor lilt'e kilten comes mewing in vain To pitying Ethel for shelter and food. She flies from her prelitiest castle in Spain To play with the baby, who will not be good. She lives in a beautiful world of her own,

And yet I have heard, and I'm sure it is true, his dear little dreamer has never been known To think of herself much; 'tis always of you. And that's why we love her, and not for the gold Of her loose waving hair nor the blue of her eyes, though the one is more precious then jewels untold And the other was borrowed right but of the skies.

And oft as she travels in Nobedy's Lind— A wide, sunny country where all things are fair— Wheever needs Ethel has only to slang With a word and a smile justin frontef her chair. Perversity of Women. The perversity of the fair sex is something fearful and wonderful. Your aver-

ago woman suffragist will travel, lobby, read papers, attend conventions and worry legislators as long she has a hairpin left, to get her divine right of voting, and then, when it is given to her, she wen't use it. Vermont furnishes the lutest example of this. Now, the ques- If tion is, when women talk about wanting the suffrage, do they really want it, or dress and boot, we could seen show do they talk for the sake of talking, as them as healthy and robust a race as tyrant man sometimes accuses them of their own. English women put on broaddoing?-Buffalo Express.

The Latest Novelty in Corsets. "One of the latest sensational novelties," writes Clara Belle, "is tho electric corset, of which rival manufacturers display a variety. All are made on the principle of substituting magnetized steel strips for the usual metal or bone. One enterprising exhibitor has his contrivance most neatly fitted on a pretty girl, and illustrates how completely she is lightning-bound by touching her corset here and there with a piece of steel. A spark drops out at every contact. What would happen if a magnetic kind of a chap hugged her can only be conjectured. As she is on exhibition in a dim room, the display of fire-works is excellent, considering that it doesn't cost anything. But it is for women only; not that there is anything indelicate about it, either, for the girl is all covered but her arms and neck, and is far less bare than the average belle at a ball. Still, I suppose that men would jam that store, and light like mad to get into the front row, if sho were made visible to their sex, just because she is arrayed in her dimity. There seems to be a vast difference, to men's eyes, between the tweedle-dee of an outer dress and the tweedle-dum of underclothing. I can't uuderstand why, but it is so. Nino meu out of ten will rush wildly to a window to see a woman in flowing white across tho way, and turn away disappointed when they find that the snowy garment is a wrapper instead of a chemisc.

Almost every dressmaker will tell the inquirer that there are but few women that can have dresses in which the two sides are made exactly alike. One will have a slight curvature of the spine, one shoulder or hip higher than the other, or some other irrregularity of the kind. On this basis of fact gymnasiums for women are being started in all the large cities, with a view to remedy this. The Human Form.

not by padding and lacing to force symmetry, but on the theory that gymnastics will remedy the fault if properly employed. And so the teachers—always women-introduce the use of light Indian clubs, dumb-bells, trapezes, ladders and other appliances or exercises. Then the candidate for shaping is first carefully examined in order to determine exactly her departure from true grace and accuracy. Then the kind of exercise to develop the lacking spot is prescribed. If one hip is larger, swinging from the trapeze, accompanied by a swaying from side to side, is recommended. If round shoulders are the blemish, club-swinging and hanging by the hands from rings are the proper exerwhere they have gymnasiums are advised to practice with a light pair of Indian clubs until in a perspiration, then plunge in a tub of warm water, and rub themselves vigorously with a coarse towel; and practicing this daily, head-

aches and lassitude will never come to the exercisers. Wulking and horseback riding are also good methods for developing the form, enhancing the charms and perfecting the health of women, but when they nttempt to walk in the high-heeled, narpresent style of dress, walking is not only wearisome but positively painful. If American girls would copy their English cousins in their style of walkingsoled shoes with low heels, thick walk. ing-dresses that give plenty of freedom and allow them to swing their arms freely, and start off on a five-mile tramp, coming home more fresh than the Amer ican woman who walks ten blocks. If it distresses ladies to think of swining their arms, why not reflect upon the awkwardness of their appearance with the hands incased in mul's, or in the large, heavily-lined fur circulars which pinion the arms tightly to the sides and impode the ocomotion, remiering it not only diffienlt but almost impossible. But young ladies who move in the "best" society dawdle and wabble along and thus prove

to the observer that they have neither muscle or backbone. Still for those who will not walk is left horseback riding, and as that is fashion able, wemen are in this way forced to take exercise, who would not otherwise get out of doors, unless in a carriage. A lozen women ride now where one woman rode a few years ago, and women aro daily seen taking this healthy exercise in the fashionable parks and boulevards. American women certainly ride, when they can ride at all, much more gracefully than the women of other nations, their English cousins by no means excepted; and it is pleasant as well as pic turesque to see them well mounted. They may not have the stamina of the English, but they certainly bear themselves more becomingly in the saddle.

The Great Wellington.

The great Wellington, "the Iron Duke," was born May 1, 1769, at Danbrother was the Murquis Wellesley. Ho completed his military education in the tered the army in 1787 as an ensign, and 1793 was a Licutenant Coloncl. a brief service in the Netherlands he dis- yard. linguished himself in several repulses of from 40,000 to 50,000 strong; fellowed was made K. C. B., and received the thanks of Parliament and the King. In 1805 he returned to Great Britain, obtained a seat in the House of Commons, and in April, 1807, was appointed Chief Secretary of Ireland. In the year following he went to Spain in command of an expedition to drive ont from that peninsula the French forces, and, after several affairs, defeated Junet in the battle of Vimicira, and was thanked by the Commons. He was subsequently row-soled shoe, and heavy skirts of the made Murshal General of the Portugueso army; various combats cusued, and then the vietery of Talavera, where a desperate struggle took place; he was again thanked by Parliament, and was created a peer and given a pension of £2,000. His next feat was to repulse the French attacks, September, 27, 1810, at Busaco, and the year after he received the thanks of Parliament for liberating Portugal. Spain had next to be cleared im. For his brilliant services at the

terming of the fortress of Cindad Rodigo, January 19, 1812, he was created n grandee of Spain, again thanked by Parnament, £2,000 of a further pensiongiven him, and he was advanced to the the latter close every opening and chink eernge with the title of Earl of Wel- where air can escape, place a pound or received the Order of the Golden Fleece, possible. and was made Generalissimo of the Marquis of Wellington. Wel- row. Experience shows, however, that where stimulating condiments and excess tween the pudding.

> SPEAKING of the hereditary diseases and the importance of sound breeding stock, Manly Miles gives the following case in illustration : A mare affected with ring-bone, that unfitted her for farm work, was kept as a breeder for several years. Her colts were quite nniform in indications of the disease when two or three years old, they found ready bnyers at good prices. At the age of five or six years, however, they all had ringbone, to a greater or less extent, and

several were entirely disabled. In his narrative of the experience of Good food and pure water, regularly given, are most essential points in feeding cows. It has been proven that cows. which have been fed regularly on food somewhat inferior, have yielded more milk than those to which richer food has been given, yet not at regular intervals. Irregularity in the honrs of feeding is invariably followed by a smaller supply of milk, and where this falling off has taken place it takes seme time for the cow to resume giving her proper quantity, In the centre of the little shop, six because they could take to the water so or that which she has been accustomed

THE pig acquires a full mouth of ineisor teeth at about three months old, some time previous to which three molars have appeared in each jaw, viz: the primolars and the fourth permanent molars appear; in nine months the tusks and fifth permanent molar are changed. Three months later the first, second and third temporary molars are shed, through a cabin air port, and it was a and replaced by permanent ones. At eighteen months the sixth or last molar and the lateral inciser are cast, and the changes at this time are complete.

Wirm every improvement in "blood" a corresponding improvement in feeding and managing live stock must be made or nature will surely thwart the breeder's plans by asserting her supremacy and adapting the animal to the conditions in which it is placed. In the cross of a superior breed upon the average stock of the farm, the best results can be obtained by a better system of feeding than the original stock had been accustomed to. An increase in size and the ability to fatten rapidly would become a source of weakness rather than an advantage in animals that are unable to obtain a sufficient supply of food to give a full and active development of

lic system. and in those sections where roots are but and most of the shots had fallen short. little cultivated are very profitable as This was not extraordinary, because it food for cattle. James J. H. Gregory says a half-acre of these squashes have averaged seventy-five pounds each in weight. Among prolific varieties for stock the vegetable marrow holds high Au Englishman landed at Dublin a rank. Fourteen tons have been raised men of the mammoth Yellow Chili squash grew to the weight of 192 pounds, another in Nebraska reached a weight of 239 pounds; from two seeds the same party raised uine squashes weighing 640 pounds. From the seeds of Mammoth 75 up to 104 pounds, and all from three

Milk, either of cows or goats, is easily obtained in Italy, and is one thing in which the Italiaus are scrupulously hon-cst, and they cannot help that either. The law obliges them, if desired, to men eat knows what appetites they have and can understand how busy the woman of the house must have been cooking for the house must have been cooking for the house must have been cooking for the convergation went on.

LYDIA E. PINEHAM'S Vegetable Compound change of life.

The word cash is derived from the Italian cassa, the chest in which Italian merchants kept their money, as do at the present time the Spaniards in their caja, and the Portuguese in their caxa, and the French in their caisse. The application of the word "cash" to money, is altogether Euglish, it not having a corresponding term in any other Enropean language. Cash having been so uconsiderately adopted instead of cassa (ehest), entries in the cash book (it should be chest book) are made in counting-honses in this unmeaning way: "Cash Dr." and "Cash Cr.," whereas the chest, and not the money, is Dr. to what is put into it; and credit for what is taken out.

In China cash is the one-thousandth idiot, and was placed in the District of | part of u tael, or about one-tenth of an American cent. Remedy for this as well as other painful allments.

WI'LL NAIL ITS COLORS TO THE MAST.

"Ilello, Denny! what is the trouble?" "Oh,
I'm all broke up," was the response to the inquiry 'an old shipmale of William G. Denniston, one of Farragut's war-worn veterans, well
known in the southern section of this city, who
came limping into the American office yesterday.
"I thought I would go under the hatches this
time," continued Denniston. "I never suffered
so mitch in my life. I had the rhelimatic gout
so bad that I could not get off the bed or put my
foot to the floor, and would have been there yet
if a friend had not recommended St. Jacol: Onle
to me. I hesitated some time before getting a
bottle, thinking it was another one of those advertised nostrums, but was finally induced to give it
a trial, and a lucky day it was for me. Why,
bless my stars! after bathing the limb thoroughly
with the Oil I felt relief, and my faith was planned
to St. Jacou and his Oil after that. I freely say
that iff it had not been for St. Jacous Oil I should,
in all probability, be still housed. My foot pains
me lattlittle, and the swelling has entirely passed
away. It leads any thing of the kind I have ever

the knows what the fairles are talking about
When tiptos they poise on the rim of a flower;
The anow-birds before her trip fearlessly out,
And gossip away in the cold by the hour.

he lives in a beautiful world of her own, And yet I have heard, and I'm sure it is true, his dear little dreamer has never been known To think of herself much; 'tis always of you.

And oft as she travels in Nobody's Land— A wide, sunny country where all things are fair— Wheever needs Ethel has only to stand With a word and a smile just in front of her chair. Perverilty of Women.

The perversity of the fair sex is some-thing fearful and wonderful. Your averthing fearful and wonderful. Your average woman suffragist will travel, lobby, read papers, attend conventions and worry legislaturs as long she has a hairpin left, to get her divine right of voting, and then, when it is given to her, she won't use it. Vermont furnishes the latest example of this. Now, the question is, when women talk about wanting the suffrage, do they really want it, or do they talk for the sake of talking, as tyrant man sometimes accuses them. tyrant man sometimes accuses them of doing?—Buffalo Express.

The Latest Novelty in Correta. "One of the latest sensational novelties," writes Clara Belle, "is the electric corset, of which rival manufacturers display a variety. All are made on the principle of substituting magnetized steel strips for the usual metal or bone. One enterprising exhibitor has his contrivance most neatly filted on a pretty girl and illustrator how compretty girl, and illustrates how com-pletely she is lightning-bound by touch-ing her corset here and there with a ing her corset here and there with a piece of steel. A spark drops out at every contact. What would happen if a magnetic kind of a chap hugged her can only be conjectured. As she is on exhibition in a dim room, the display of fire-works is excellent, considering that it doesn't cost anything. But it is for women only; not that there is anything indelicate about it, either, for the girl is all covered but her arms and neck, and is far less bare than the average belle at is far less bare than the average belle at a ball. Still, I suppose that men would jam that store, and fight like mad to get nto the front row, if she were made visible to their sex, just because she is arrayed in her dimity. There seems to be a vast difference, to men's eyes, between the tweedle-dee of an outer dress and the tweedle-dum of underelothing. I can't understand why, but it is so. Nine men out of ten will rush wildly to a window to see a woman in flowing white across the way, and turn away disappointed when they find that the snowy garment is a wrapper instead of a chemise."

As little Mrs. Blifkins was getting world's benefactors. He was laupper the other night she was startled 1766, in Portsmouth, England.

"How long since you've seen Mr. Blifkins?" she asked breathlessly.

Little Mrs. Blifkins dropped the teapot she was just about to fill, and screamed convulsively and loudly.

"Be composed," ejaculated Miss Parrot, taking off her hat and fanning her heated face with it. "Try and bear up; it's dreadful, but other women have suflered and lived. I may as well tell you and not keep you in suspense. Mr, Blifkins is dead." 'Oh-oh-oh-oh, gracious mercy!" shrieked Mrs. Blifkins, throwing herself into Miss Parrot's arms. "What have I done to deserve this? and it was his birthly as well tell you poor child had not the use of his feet, which overlapped each other, and turned inward. The kind uncle did not rest until he had gradually untwisted the feet, strengthening them by an apparait was his birthday, too, poor, dear David; you can't mean it, and wo so

happy."
"Yes, I do mean it," said Miss Parrot firmly. "It is a cruel truth. I said, I'll go and tell his poor wife, for sho "It is a cruel truth. I said, must know it soouer or later; he was

found lying dead—"
"Oh-oh-oh-oh," sobbed the little wife incoherently, "and I had such a nice supper all ready for him, tool Oh, it's dfnl and I can't believe it. I won't eve it. Who saw him, poor, dear

"I saw him!" said Miss Parrot with a grimace of disgust. "We all saw him! He wasn't the only one either. There were a dozen of 'em, and they were all hopelessly dead drunk!"

Then little Mrs. Blifkins turned on mo out of my senses and spoil my sup- loft which was John's bedroom. Others

And Miss Parrot heard the door slam as she skimmed through it on her way out to inform the neighborhood.—De-

Eminent Women-Mrs. Job. The world has been sympathizing with Job for 2,000 years, and pitying his sufferings and tribulations, but hardly a thought seems to have been taken of Mrs. Job and her trials, which must have been of no ordinary nature. True, she didn't have any boils, her husband, with true masculine selfishness, appropriating them all to himself, but she had to wait on him and listen to his com-

There seems to have been a constant stream of people coming to see Job to condole with him. Not only did the neighbors drop in continually to see how was getting along, each one with a ferent remedy for boils, but relatives me from long distances, and of course ey had to be entertained and fed. is made a great deal of work for Mrs. ob, who, on account of her husband's attraordinary losses, couldn't afford to extraordinary losses, couldn't afford to keep a hired girl. What with cooking meals for the guests and poultices for Job, she had hardly a minute to herself. Had she uot been a remarkable woman she never could have gone through with it.

Job's case was discussed a great deal in the papers, and scientific men came from all parts of the country to study it. Job stood this with that patience that became proverlial, and was never out of humor as long as the boils lasted. All these people boarded at the Job mansion, and any oue who has observed scientific men eat knows what appetites they have and can understand how busy the woman of the house must have been cooking for

them.

The trials of the man of Uz were certainly very great, and if we of to-day were subjected to the like of them there is probably not a man of Uz who could go through the programme without kicking; yet sympathy for Job should not blind us entirely to the sufferings of his heroic wife.—Saturday Night.

not by padding and lacing to force symmetry, but on the theory that gymnas-tics will remedy the fault if properly employed. And so the teachers—always women—introduce the use of light Indian clubs, dumb-bells, trapezes, ladders and other appliances or exercises. Then the candidate for shaping is first carefully examined in order to determine exactly her departure from true grace and accuracy. Then the kind of exercise to develop the lacking spot is prescribed. If one hip is larger, swinging from the trapeze, accompanied by a swaying from side to side, is recommended. If round shoulders are the blemish along and hanging by If round shoulders are the club-swinging and hanging by the hands from rings are the proper exercises. Those who do not live in towns where they have gymnasiums are advised to practice with a light pair of Indian clubs until in a perspiration, then plunge in a tub of warm water, and rub themselves vigorously with a coarse

towel; and practicing this daily, head-aches and lassitude will never come to Walking and horseback riding are also good methods for developing the form, enhancing the charms and perfecting the health of women, but when they attempt to walk in the high-heeled, uarrow-soled shoe, and heavy skirts of the present style of dress, walking is not only wearisome but positively painful.

If American girls would copy their English cousins in their style of walking-dress and boot, we could soon show them as healthy and robust a race as their own. Eeglish women put on broad-soled shoes with low heels, thick walkng-dresses that give plenty of freedom and allow them to swing their arms freely, and start off on a five-mile tramp, coming home more fresh than the Amercan weman who walks ten blocks. If it distresses ladies to think of swining their arms, why notrefleet upon the awkwardness of their appearance with the hands icased in muits, or in the large, heavly-lined fur circulars which pinion the arms tightly to the sides and impede the ocomotion, rendering it not only diffienlt but almost impossible. But young adies who move in the "best" society dawdle and wabble along and thus prove to the observer that they have neither

muscle or backbone.
Still for those who will not watk is left orseback riding, and as that is fashionable, women are in this way forced to take exercise, who would not otherwise get out of doors, nuless in a carriage. A dozen women ride now where one woman rode s fow years ugo, and women aro daily seen taking this healthy exercise n the fashiouable parks and boulevards. American women certainly ride, when they can ride at all, much more gracefully than the women of other nations, their English consins by no means excepted; and it is pleasant as well as pic presque to see them well mounted. They may not have the stamina of the English, but they certainly bear themselves more becomingly in the saddle.

boy, his nepliew, came to live with Uncle | dents in his remarkable career. He re-John and the linnets and sparrows. The tired from public civil life in 1846, and poor child had not the use of his feet, died at Walmer Castle September 14. feet, strengthening them by an apparataught them to walk.

the lame cebbler, with his jolly face and

wero on boxes or blocks of wood, and some sat contentedly on the floor. They learned to read, write and eigher as far as the Rule of Three; and besides they learned good morals, for much homely wisdom fell from the cobbler's lips.

Hundreds of boys who had no other chance-for hogathered his scholars from the poorest of the poor-learned all thoy ever knew of books from this humble teacher. His happiest days were when some sunburned sailor or soldier would "Why, master dear, you suerly have not forgotten me, I hope?"

John Pounds taught his little school

John Pounds taught his little school for more than forty years, never asking nor accepting a cent of payment from any one.

At the age of seventy-two, ou Jan. 1, 1839, he suddenly died, while looking with delight at a sketch of his school which had just been made by an artist. For many days the children of the place were inconsolable, and by twos and threes they came and stood by the closed door, which, in John Pound's threes they came and stood by the closed door, which, in John Ponud's time had always been open to the

A life like this, so lowly yet so useful, containes lessons for us all.—Harper's.

A Hint for Summer.

The tattie in India, says Chambers' urnal, is a large curved or sloping creen, which accurately fits into each door or window facing the west, and is aade of the roots of the khuskhus grass (Andropogon muricatus), which singularly combines strength and porosity with the most delicious and refreshing ragrance. These screens are about an nch in thickness, and, during the hotand dry west wind, are saturated from ontsido with water, which immediately comrking order all other cooling applinces are unnecessary. In the neigh-orhood of Gwalior and Jhansi there is other form of tattie. A small creeping, thorny variety of the ber (Zizyphus jujuba) is largely found in the jungles; this is collected and dried, and at the proper time the whole west veranda is inclosed with thorny walls nine to ten inches thick, and these being saturated from the outside, all doors are thrown open, and a delightful temperature is secured. Tatties are of no use during the easterly wind, which ushers in and accompanies the rains. Laden with apanies the rains. Lauce ture, it is a damp wind, and, therere, retards evaporation.

Man are less prone to be unnerved by their fears than women. Women are more prone to be nerved by their affection to great actions than meu,

The Great Wellington.

The great Wellington, "the Iron Duke," was born May 1, 1769, at Dangan Castle, Ireland; his father was Garrett, first Earl of Mornington, and his brother was the Marquis Wellesley. Ho completed his military education in the military college of Angers, France; entered the army in 1787 as an ensign, and 1793 was a Lieutenant Colonel. In a brief service in the Netherlands he distinguished himself in several repulses of the French and in 1796 went to India the French, and in 1796 went to India, where he rose rapidly, and made his first grand success at Assaye, with 4,500 men defeating the combined Mahratta forces, from 40,000 to 50,000 strong; followed by the victories of Argaum and the great fort of Gawulghnr; for these services he was made K. C. B., and received the thanks of Parliament and the King. In 1805 he returned to Great Britain, obtained a seat in the Honse of Comme and in April, 1807, was appointed Chief Secretary of Ireland. In the year folowing lie went to Spain in command of an expedition to drive ont from that peninsula the French forces, and, after several affairs, defeated Junot in the battle of Vimicira, and was thanked by the Commons. He was subsequently made Marshal General of the Portuguese army; various combats ensued, and then the victory of Talavera, where a desperate struggle took place; he was again thanked by Parliament, and was created a peer and given a pension of £2,000. His next feat was to repulse

the French attacks, September, 27, 1810, at Busaco, and the year after he received the thanks of Parliament for liberating Portugal. Spain had next to be cleared of its invaders, and this duty also fell to him. For his hrilliant services at the storming of the fortress of Cindad Rodigo, January 19, 1812, he was created a grandee of Spain, again thanked by Parliament, £2,000 of a further pension given him, and he was advanced to the eerage with the title of Earl of Welngton. In April he took Badajoz and on July 22 took Salamanca, one of his greatest military triumphs; for these he received the Order of the Golden Fleece, and was made Generalissimo of the panish armies, was ouce more advanced in the British peerage by the title of Marquis of Wellington. Parliament thanked him again, and £100,000 were laid out in the purchase of lands to be his enemies, the French, at Victoria, under Junot, and added another victory to his list, and was made a field marshal of Great Britain, and succeeded in driving the French out of the peninsula of the British forces was created Marquis of Douro and Duke of Wellington in the British peerage, and received an additional grant of £100,000 and took his seat in the House of Lords. When raw sngar. Napoleon escaped from Elba, Wellington was placed in command of the British forces on the Continent, and the two great antagonists met at Waterloo, with the result know to all the world. In the centro of the little shop, six because they could take to the water so the lame centre of the little shop, six because they could take to the water so that which she has been accustomed to do with regular facility. During the misty times they were very twinkling eyes, would be seated, his last | bold, and on one occasion a she bear or lapstone on his knee, and his hands with two cubs approached the ship to busily plying the needle and thread. within 400 yards of the starboard All around him would be faces. Dark quarter. Fortunately the dogs were on Miss Parrot like a small fury. "You're a uasty, prying old maid," she said vindictively, "and I'd likak you to go voices and the tapping of slate pencils quictness prevailed, and a squad of about dictively, "and I'd thank you to go home and attend to your own attairs. Were mingled with the singing of the buzz of the birds which enjoyed the buzz of the bears and third temporary molars are shed, and the bears and third temporary molars are shed, and replaced by permanent ones. At can't keep his own birthday to snit him-sclf, but prying folks must make such a fuss about it, coming here to frighten school. Some of the pupils sat on the steps of the narrow stairway which led up to the two cubs approach the ship in a wondering and cautious manner. I could see better under the mist than the people on the poop. Heard the Captain say: "Do any of you think it is over 250

All seemed to agree, and he said:

"Aim at 250 yards, and wait for the word 'fire!'" Then succeeded a volley. The bears reeled and made several turns, and I thought that we had bagged all of them, but was astonished to see them get up and walk off in the most lively manner. stop in his doorway, perhaps with a parrot or a menkey in his arms, saying:

Of course, all the dogs took the alarm and pursued them to the first erack, which the bears calmly swam across and thus escaped. But large drops of blood were seen, and the she-bear lay down once or twice as if wounded. In making her retreat she drove her cubs before her, and became impatient when they moved slowly. The bears had been hit, but the distance had been underestimated, and most of the shots had fallen short. This was not extraordinary, because it was very misty.

The Irish Thirst for Gore. few months ago filled with appreheusion that the life of any loyal subject of her Majesty was not worth a farthing there and thereabout. The Land Leaguers, he imagined, were all bloodthirsty assassins, and all that sort of thing. But it was his duty to travel in the land-a dnty he approached with fear and trembling. Now, there happened to be on his ronte a number of towns, the names of which begin with the suggestive syl-lable "Kil." There were Kilmartin and so on. In his ignorance of nomencla-ture his affrighted senses were startled anew on hearing a fellow passenger in the railway carriage remark to another as follows

"I'm just after bein' over to Kilpatmences evaporating under the fiereeness of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast; and as evaporation always implies cold, the wind which, in the server of the blast is a server of the

"Major, I see two cocktails carried to your room every morning, as if you had some one to drink with." "Yes," sir; one cocktail makes me feel like another man; and, of course, I'm bound to treat the other man." FARM NOTES.

THE REPORT OF THE PERSON OF TH

DRIED brewer's grains are a novelty in British markets. Fed to sheep it is claimed they have an influence in preventing or checking the "ret" in sheep. One praiseworthy act of the Iowa Legislature was the adoption of a law directing that at least twelve shade trees shall be set out in every school-house

It has been estimated by an entomologist that 2,000 chinch-bngs on a farm, in spring, will, in a favorable season, if undisturbed by quail or other enemies, increase in one year to 2,000,000,000. CANE syrups show a greater tendency than beet syrups to become acid and pass into the invert form of sugar in the process of boiling down. The loss of crystallized sugar from this cane is very

FLAX is cultivated as a field erop in California for the seed only. The crop of 1881 produced 10,167,545 pounds of seed, grown on 10,952 acres. The fibre is not utilized in any general way, and is only to some small extent locally. THE principal food of the farm laborers of Orkney Islands is oatmeal, potatoes, fish and milk. Bread of fine wheat flour does not give strength to work, and

English tourists express surprise at the

apparent vigor and yenthfulness of the

Orkney octogenarians. In FLANDERS it is customary to churn the milk in summer after twenty-four honrs, but in winter three days are alowed to expire, when the milk is poured nto the tub that stands in the cellar. If it then does not become sour, the dairymen place a can with warm water

in the tub to accelerate it. For disinfectants about poultry houses and sheds, smoke from a wood fire is one of the best; also sulphur. In using the latter close every opening and chink where air can escape, place a pound or two of brimstone, in small pieces, into an iron pan and let it gently hurn, leaving the house shut up for the day if possible.

THE average of German observations show that the annual yield of milk rises gradually from the birth of the first calf till the fifth, reaches its maximum after the sixth, sinks then gradually till the tenth calf, when it is about the same as settled on him and his heirs. Ho met at the first calving, and, after the thirties enemies, the French, at Victoria, teenth or fourteenth calf, is only oneourth or one-fifth of the maximum yield. IT HAS been estimated that sugar-cane contains about eighteen per cent. of sngar, of which about one-third is left in by the time Napoleon had been persuaded the canes after crushing, and is, there-to sign his abdication. The great soldier fore, lost; that an age of land will grow

> THE usual theory as to crooked breastbones is that they are eaused by giving perches to chickens too early in life, or by the perch being too large or too narrow. Experience shows, however, that crooked breast-bones are found if the fresh air, and ample, nutritions food.

Speaking of the hereditary diseases and the importance of sound breeding stock, Manly Miles gives the following case in illustration: A mare affected with ring-bone, that unfitted her for farm work, was kept as a breeder for several years. Her colts were quite uniform in form and color, and, as they showed no indications of the disease when two or three years old, they found ready buy-ers at good prices. At the age of five or six years, however, they all had ring-bone, to a greater or less extent, and several were entirely disabled.

Good food and were water, regularly given, are most essential points in feeding eows. It has been proven that cows, which have been fed regularly on food somewhat inferior, have yielded more milk than those to which richer food has been given, yet not at regular intervals.

The pig acquires a full mouth of incisor teeth at about three months old, some time previous to which three molars have appeared in each jaw, viz: the first, second and third. At six months the primolars and the fourth permanent molars appear; in nine months the tusks through a cabin air port, and it was a and replaced by permanent ones. At very fine sight to see the mother and her eightcen months the sixth or last molar and the lateral ineisor arc cast, and the changes at this time are complete.

With every improvement in "blood" a corresponding improvement in feed-ing and managing live stock must be made or nature will surely thwart the breeder's plans by asserting her supremacy and adapting the animal to the conditions in which it is placed. In the eross of a superior breed npon the average stock of the farm, the best results can be obtained by a better system of feed-ing than the original stock had been accustomed to. An increase in size and the ability to fatten rapidly would be-come a source of weakness rather than an advantage in animals that are unable to obtain a sufficient supply of food to give a full and active development of

the system. MAMMOTH squashes, though of but little value for table use, on rich lands and in those sections where roof table as and in those sections where roots are but little cultivated are very profitable as food for cattle. James J. H. Gregory says a half-acre of these squashes have averaged seventy-five pounds each in weight. Among prolific varieties for stock the vegetable marrow holds high rank. Fourteen tone have been rejected. An Englishman landed at Dublin a cow months ago filled with appreheusion that the life of any loyal subject of the man month yellow Chiling there and thereabout. The Land Leaguers, he imagined, were all bloodthirsty another in Nebraska reached a weight of 239 pounds; from two seeds the same consequences and all that cort of this property is an all that cort of this property is an all that cort of this property is an all that cort of the same cort. party raised nine squashes weighing 640 pounds. From the seeds of Mammoth squashes a Minnesota grower reports squashes weighing 115, 137 and 139 pounds each, and several others from 75 up to 104 pounds, and all from three

MILE, either of cows or goats, is easily obtained in Italy, and is one thing in which the Italians are scrupulously honest, and they cannot help that either. The law obliges them, if desired, to drive the cows or goats to your door to be milked, and it is a very pretty sight to see, about six or seven o'clock in the morning, the long droves of pure white morning, the long droves of pure white veranda, would raise the thermometer to
120 degrees Fahr., passes into the house at 75 degrees or 80 degrees, laden with a delicious fragrance. While tatties are in licly!"

"What murderers they are!" thought goats pattering through the streets from door to door, and then milked directly into one's own vessel. Our city milkmen men might take some lessons in honesty. the Englishman. "And to think that they talk of their assassinations so publicly!"

But the conversation went on.
"And fhare are you goin now?" asked assassin No. 1.
"I'm goin home, and then to Kilmore," was No. 2's reply.
The Englishman's blood curdled.
"Kilmore, is it?" added No. 1.
"You'd betther be comin' along wud me to Kilmaule!"

It is related that the Englishman left the train at the next station, probably to go back to the tight little island and report an alarming increase in the number of ontrages in Ireland.

"And to think that door to door, and then milked directly into one's own vessel. Our city milkmeu might take some lessons in honesty, even from Italians. Goats and sheep are raised on the heights of the mountains, above the line where olives or grapes can be profitably cultivated. They are attended by shepherds or goatherds, who wear a peculiar dress, consisting of a red-knit cap, like an old-fashioned uightcap, knee-breeches with coarse, white woolen stockings and a vest of lambskin, with the wool on, with long sleeves also knit of coarse, white woolen yarn. They present a very pioturesque appearance when they come down with their flocks.—Boston Cultivator.

HOUSEHOLD HELPS

Housekeepers, and the results of actual experim PARKER HOUSE ROLLS, One quart flour, one cup milk, teaspoonful salt, Review.

two tablespoonfuls yeast, one tablespoonful shortening.

The state of the s

FROSTING. - Beat the yolks of two eggs, add ten teaspoonfuls powdered sugar, after frosting the cake, set it in a cool, dark place to stiffen.

In New York of what is known the cake sugar, after frosting the cake, set it in the Custom-house variety, he numbered among his friends the mate of a vessel, SUGAR ICING FOR CAKES. -Sift pulveregg add six teaspoonfuls sngar. If the cake is a white one, use lemon extract;

beat the egg to a stiff froth before adding sugar; this will harden in a short time, and is very good. DOLLY VARDEN CAKE. - One half cup butter, one cup sugar, beat to a cream: the whites of three eggs, beat to a fer Washington with a cargo of hardstiff froth, now beat all together. Threefourths cup of milk, one and one-half teaspoonful baking powder in two cups

of flour; flavor to taste.

WHITE FRUIT CAKE.—One pound of butter, one and one-quarter of flour, whites of eighteen eggs, one pound sugar, one teaenpful milk (sweet), one teaspoonful baking powder, two onnees teaspoonful baking powder, two onnees almonds, half pounds citron, or the almonds may be left out if preferred. which resulted in the almost immediate Leave out the fruit and this is delicious return of the patient's reason, the inter-

DRIED APPLE PUDDING.—One teachp cooked dried apples, one cup melasses, ono and a quarter cups flour, one-quarter enp butter, one egg, one teaspoenful seda, one teaspoonful ground einnamon, a little grated nutmeg. Bake as soon as mixed, serve hot with sauce made of one eup sugar and half eup butter beaten smooth and flavored with grated nut-

Coffee Cake. - Two teacups brown sugar, one of molasses and one of butter. one of strong coffee, four of fleur, four eggs, two tablespoonfuls cinnamon, two of spice, two of soda dissolved in the coffee, half-pound raisins well seeded half pound citron well ent up into small strips, half pound currents. I always brown my flour for this.

WEDDING CAKE, -One and one-half bounds tleur, one and one-half butter, one and one-half pounds sugar, eighteen one-half ounce of cloves, one-half onnce nutmeg, one-half onnce mace, one gill wine, one gill brandy, one gill molasses, three pounds currants, four and one-half pounds raisins, one and one-half pounds citron, one teaspoonful soda. Bake three hours. This makes three loaves; use pastry flour.

STEWED BEEF WITH VEGETABLES.-Wash and cut the beef into moderate ized pieces; put into a porcelain kettle and simmer for three hours, adding salt after it has been well skimmed one hour and a half before dinner, put in your vegetables, potatoes, parsnips, onions, or any kind; let them cook quietly until time to dish up; dissolve one tablespoonful of flour in cold water; add to tho juice in kettle for a rich gravy. Cold roast beef is delieious cooked over in this way.

QUEEN OF PUDDINGS. - One pint of nice fino bread ernmbs, four eggs beaten well, the grated rind of a lemon, one cup of sugar; mix well, pour into a deep dish and bake to a nice brown; then having beaten and sweetened the whites Probably not, and yet he was one of the world's benefactors. He was born in 1766, in Portsmouth, England.

Inglom had command of the allied chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presume the constitutional vigor, or if the birds are pampered and brought up at high presumers are found if the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found if the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found if the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found if the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found if the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found if the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found if the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found if the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found in the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found in the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers are found in the chicken is a weakly one and wanting in constitutional vigor, or if the birds are pampered and brought up at high presumers. sure in confined and over-crowded pens, is nice, or whipped whites spread be

LEMON PIE.—Two lemons sliced thin and seeds taken out, two cups cold water, two cups sngar, two tablespoonfuls flonr wet and stirred until smooth, volks of six eggs, bake. Frosting-Whites of the eggs beaten to a stiff froth, and a cup and a half of white sngar; when the pie is uearly or quite heard of any of them shooting anydone put the frosting on and return to the oven until it is lightly browned. This makes four good-sized pies. Only

COLUMBUS EGGS.—A nice supper dish -Boil eggs until hard dono; when perfectly cold peel off the shells, carefully ent them open with a sharp knife, take out the yellows and mash them fine; add grated or mineed ham (boiled, of course, beforehand), chopped onions, mustard, pepper, butter, or better still, salad oil, Vorcester saneo, salt and vinegar. Fill the whites with this dressing, then join together to resemble an nubroken egg. placo lettuco or parsley leaves in a flat dish and lay the eggs nicely and tastcfully upon them.

POTATO SALAD. - Take four or five ordinary sized Irish potatoes, mash well and pour in two tablespoonfuls melted butter, two onions chopped fine, one teaspoonful of salt, one of mustard, one of black pepper; mix together thoroughly with the yolks of three hard boiled eggs; moisten tho salad with half a teacnp of vinegar; pnt this into a deep glass bowl, and chop the hard boiled whites very fine, with cucumber pickles, two or three; spread over the salad.

BOSTON BAKED BEANS. - Pick one quart of beans, and let sook over night. In the morning put on to boil in cold water with half a teaspoonful soda; boil thirty minutes; drain and put in an earthen pot with two tablespoonfuls molasses. When half the beans are in the pot, put in half or three-fourths of a pound of pickled pork washed and cut in slices; cover all with hot water, and bake six hours in a moderate oven, they cannot be too long. Keep covered so they will not burn on the top. Serve in the dish which they are cooked. "Householders," try this, and see if they are not nice. Old beans require a longer time to cook, and may have to be filled with hot water two or three times. A trial will settle the bean question.

Taxes in Holland.

Taxes in Holland, Mr. Bird tells us, are generally very high, and, it is clear, are often very mischievous. Here they might learn much from us. "There is a tax on every window, door, chimney, servant, * * * on every article of household furniture in use. One must even pay for the privilege of earning one's daily bread, no man being permitted to carry ou a profession, trade or occupation of any sort unless he obtains what is called a "patent." The poor tax-payer has not even the satisfaction of having his taxes called for. He must take the money to the collector's office, and often lose au hour or two while waiting till the great man cau attend to him. Should he be behind in the payment, one or two hinngry militiamen are quartered in his house at his expense until he has cleared off his arrears. Two hundred years ago boots and shoes, "those articles so essential to human comfort," as the \$200 needed to satisfy the claim. our author somewhat needlessly describes them, were not only taxed, but the proceeding caused considerable com were conspicuously marked on the upper leather with the Government stamp. Medical men have their fees fixed by law, and fixed at a low rate. To make up for this, no druggist can sell the sim-plest mixtures unless the prescriptions of a doctor be produced. If a man is suffering from headache or toothache, though he may know of some remedy which will give him relief, he cannot cal man. In some parts of Holland the houses of the poorer Boers are but little better than Irish cabins. "The family live all together in one large room, divided by wooden partitious, which serves as parlor, kitchen and bed-room, and is not unfrequently shared with a cow or doukey." The bed is a huge box, filled with heather or seaweed, and in districts exposed to floods is often raised to a height of six or seven feet above the to a height of six or seven feet above the floor. In respect of cleanliness these poor people are far superior to the Irish. Even if a laborergets not more than 10s. a week, yet he, his wife and children will be seen every Sunday "respectably dressed and scrupulously elean." It is a very common custom for the peasauts to leave their wooden shoes outside the doors of their cottages, so that they may not carry the dirt inside. By counting the number of shoes it can be readily seen how many people there are at any seen how many people there are at any one time in the house.—The Saturday

Recalling Old Times.

Fourteen years ago, when Chester A. Arthur was a struggling local politician in New York of what is known there as ized sugar, and to the white of every had often occasion to use when circumstances required the votes of the floating population of the harbor front. Just about that time Arthur made an

unsuccessful effort to obtain some miner municipal appointment. The mate condoled with his political friend upon his disappointment, and soon after sailed ware. While ascending the Potomac a block and tackle fell upon the mate's head, indeuting his skull in such a manner that the man became practically an idiet, and was placed in the District of Columbia Insane Asylum. A short time ago the famons surgeon Dr. Gross, of Philadelphia, visited the asylum, exvening fourteeu years being, of course,

A day or two after his recovery, the

hand. "Glad to see you." "Howdy, old man," said the sailor. notes, and it was so easy to create this "How's things? Got a job yet?" paper currency that the value declined. Executive, with a smile. "A pretty big lars to buy a cake of rice, and at last the White Honse and see me."

amazed mariner.
"Yes, just ask for my private secretary, and he'll show you right in," and the President walked on.

"Poor old Chet!—clean gone, elean gone," mused the mate. "Actually believes himself to be President of the United States. Smart man once, too. That just shows yon, gentlemen," he continued, turning to the bystanders, "that just shows you what politics and disappointment will bring a man to. Poor old Chet!"-San Francisco Post.

Its Star Still Ascending.

In a recent call upon Mr. W. H. Me-Allister, 206 Front street, general agent for the sale of the Star Chewing Tobacco, he thus spoke to one of our reporters 'I was tortured with pain from acute rheumatism, and cared not whether I lived or died. I tried St. Jacobs Oiljnst two applications of which entirely cured me."—San Francisco (Cal.) Call.

Not so Respectable, After All.

the most respectable families in that part of the State. The public have read this of the State. The public have read this so frequently that the respectability of the family of a party to a shooting scrapo the salment have read this party to a shooting scrapo (Atr. N. J. Send for pamphlet to E. S. Wells, Jersey (Atr. N. J. S has almost become proverbial. This was illustrated admirably in a conversation we overheard a few days ago. Arcuæological researches have shown indisputably that the art of weaving was practiced in prehistoric times. It may oven date back nearly to the creation of man, as fragments ot woven cloth have been found among the relies of the Lake Dwellers, who are supposed to have been about the first representatives of the human race. The Bronze Age furnishes specimens which place the art above most others in degree of perfection, even fabrics of wool being found in the remains of Denmark, Scandinavia, and England—the remains of France and Switzerland yielding linen fabrics. The oldest historical reference to the art of weaving is furnished by the Bible. Job lamented that his days were passing with the fleet-ness of a weaver's shuttle; and Joseph was attired in "vestures of fine linen."

"Their Occupation Cone." R. V. Pierce, M. D., Buffalo, N. Y.: I was attacked with congestion of the lungs, soreness over the liver, sovere pain in the joints, a burning

fever, and general giving away of the whole sys-tem. Pailing to find relief in remedies prescribed, I tried your "Golden Medical Discovery." It effected my entire enre. HEALTH

at this season the health needs careful attention. The blood being weakened and the system run down, dangerous disease is liable to secure a hold that cannot be easily removed. What at first appears to be but slight indisposition, often develops into troubles that may be incurable.

At this season the liver becomes inactive, the complexion sallow, pimples appear on the skin, dyspepsia and indigestion affect the digestive organs, &c.

What is needed is a complete, reliable and strengthening tonic. Such a medicine is

> BROWN'S IRON BITTERS, which, by its great strength-ening powers, diffuses new life in the blood, revitalizes the whole system, giving tone to the stomach, muscles and nerves, effectually relieving all weakness and tendency to lassitude.

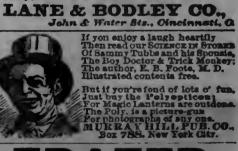

Brown's Iron Bitters is a true tonic which has been thoroughly tried, is made by a reliable firm, and has the hearty endorsement of the medical profession. It will cure dyspepsia, indigestion, and malaria, and relieve all wasting diseases, such as consumption and

kidney affections. As a medicine for those diseases peculiar to women it is without a rival.
